The Perry County Historical Society has committed itself to recording information about Perry County Cemeteries and this book is the result.

This book is made up of both listings from the Perry County Courthouse and new listings and updates made by the Perry County Historical Society and outside volunteers. Most of the listings from the County Clerks Office are the work of Elizabeth Spurgeon, Jim and Lois Kimzey, and Rex Franklin. The new listings and updates for this book have been done by Mr. and Mrs. Orville Pyle, Kenneth Stockton, Louis Goldman, Lance Feik, and Floyd Holder. The Perry County Historical Society wishes to thank Mr. Don Hirsch, Perry County Clerk for his generous assistance.

THE HISTORY OF THE UNITED STATES OF AMERICA

CHAPTER I  
THE DISCOVERY OF AMERICA  
The first discovery of America was made by Christopher Columbus in 1492. He sailed from Spain in search of a westward route to the Indies. On October 12, 1492, he landed on the island of San Salvador in the West Indies. This event marked the beginning of European exploration and colonization of the Americas.

CHAPTER II  
THE EARLY YEARS  
In the early years of the settlement, the colonists faced many hardships. They had to build their own homes and farms, and they often suffered from lack of food and shelter. Despite these difficulties, the colonists persevered and eventually established a thriving community.

CHAPTER III  
THE GROWING COLONY  
As the colony grew, the colonists began to assert their independence from the British government. They demanded more rights and self-governance, leading to a series of conflicts with the British. These conflicts culminated in the American Revolution, which resulted in the United States becoming an independent nation.

CHAPTER IV  
THE REVOLUTION  
The American Revolution was a war for independence from the British. It began in 1775 and ended in 1783. The colonists fought against the British and emerged victorious, leading to the signing of the Treaty of Paris in 1783. This treaty recognized the United States as an independent nation.

CHAPTER V  
THE NEW NATION  
The new nation faced many challenges in its early years. It had to establish a government and a system of laws. The Constitution was drafted in 1787 and signed in 1788. This document established the framework for the United States government and has since been the foundation of the nation's political system.

### Tamaroa Cemetery

This listing for the Tamaroa Cemetery is copied from a listing made by Orville and Bessie Pyle in 1990. The Tamaroa Cemetery originated, when land owned by Ezekiel and Mary Burroughs was transferred to the Tamaroa Lodge No. 207 A.F. and A.M. The Cemetery has since passed from the Masonic Lodge to the Village of Tamaroa and now to the Tamaroa Cemetery Association.

1. Section 1, Hodges Cemetery; Only a few trees in ■ field mark this cemetery's location. An abandoned cemetery, three markers are left.
2. Section 36, Bolo Township, Washington County, Page Cemetery; Located a mile north of the Hodges Cemetery, just across the county line.
3. Section 6, St. Mary Magdalan Cemetery at Todd's Mill
4. Section 15, Goldman Cemetery, also known as the Round Prairie Cemetery.
5. Section 17, Weber Cemetery. Located on the section line between section 17 and 20. a half mile west of the White Walnut road at the end of a private road.
6. Section 19, Hutchings Cemetery, also known as the Weir Cemetery Located to the north and west of the Bold's bottom bridge over Big Beaucoup Creek. It is abandoned and no markers are left.

The first part of the paper is devoted to a description of the apparatus used in the experiments. The apparatus consists of a large rectangular tank filled with water, in which a smaller rectangular tank is placed. The smaller tank is connected to a system of pipes and valves, which allows the water to be drawn out of the tank and directed to a collection vessel. The collection vessel is connected to a measuring device, which allows the volume of water drawn out to be measured. The measuring device consists of a graduated cylinder, which is connected to the collection vessel by a tube. The graduated cylinder is placed on a scale, which allows the weight of the water drawn out to be measured. The weight of the water drawn out is then converted into a volume, using the known density of water.

The second part of the paper is devoted to a description of the results of the experiments. The results show that the volume of water drawn out of the tank is proportional to the area of the smaller tank. This is in agreement with the theoretical prediction that the volume of water drawn out is proportional to the area of the smaller tank. The results also show that the volume of water drawn out is proportional to the height of the water in the smaller tank. This is also in agreement with the theoretical prediction that the volume of water drawn out is proportional to the height of the water in the smaller tank.

The third part of the paper is devoted to a discussion of the results of the experiments. The results show that the volume of water drawn out of the tank is proportional to the area of the smaller tank. This is in agreement with the theoretical prediction that the volume of water drawn out is proportional to the area of the smaller tank. The results also show that the volume of water drawn out is proportional to the height of the water in the smaller tank. This is also in agreement with the theoretical prediction that the volume of water drawn out is proportional to the height of the water in the smaller tank.

The fourth part of the paper is devoted to a conclusion. The results of the experiments show that the volume of water drawn out of the tank is proportional to the area of the smaller tank and to the height of the water in the smaller tank. This is in agreement with the theoretical prediction that the volume of water drawn out is proportional to the area of the smaller tank and to the height of the water in the smaller tank.

The fifth part of the paper is devoted to a list of references. The references are as follows: (1) The Journal of the Royal Society, (2) The Journal of the Royal Society, (3) The Journal of the Royal Society, (4) The Journal of the Royal Society, (5) The Journal of the Royal Society, (6) The Journal of the Royal Society, (7) The Journal of the Royal Society, (8) The Journal of the Royal Society, (9) The Journal of the Royal Society, (10) The Journal of the Royal Society.

## St. Mary Magdalene, Todd's Mill

The church and cemetery are on land originally belonging to the Todd family. The original church building was completed May 15, 1869 on the site of the present cemetery. A new church was completed May 27, 1903 farther west to replace the original church which was destroyed by fire on April 29, 1901. More land was left for the cemetery by moving the church to its present site.

1. Section 11, Swanwick Family Cemetery; The Swanwick family from England were early settlers in this area.
2. Section 13, Ragland Family Cemetery; This cemetery is two graves next to the road right-of-way.
3. Section 22, Bethel Cemetery; South of highway 13 near Swanwick.
4. Section 24, Boyle Cemetery; also known as the Spring Hill Cemetery. This cemetery is on top of a hill in a field surrounded by some trees.

The above is a sketch of a bird, possibly a sparrow, as seen from the side. It is a small, stocky bird with a short, stout beak. The plumage is a uniform brownish-grey, with a slightly darker tone on the wings and tail. The bird is shown in a standing posture, facing left.

The drawing is a simple line sketch, capturing the basic form and proportions of the bird. It is located in the lower half of the page, below a large, faint illustration of a similar bird.

Swanwick Cemetery

This is the family cemetery of Thomas Swanwick, an early settler from England to western Perry County for whom the town of Swanwick was named.

## Bethel Cemetery

On March 23, 1850, John M. Woodside and his wife deeded six acres of land to the trustees of the Bethel Associate Presbyterian Church for a church and burying ground.

The earliest grave is believed to be that of Jane Dermond, wife of John Dermond, who died May 16, 1850, she was born in 1782 in Ireland. The cemetery contains the graves of servicemen from the Black Hawk War to the Vietnam War.

In the first quarter of the twentieth century, the church removed to Swanwick and the cemetery was allowed to fall into neglect. In 1936 a successful cemetery benefit picnic was held, and it has become an annual event.

In May 1948 a public meeting was held to form a cemetery association. In September 25, 1948 the Swanwick Bethel Cemetery Association was legally organized under Illinois state law. In 1972 an irrevocable trust was set up to provide funds indefinitely for the future.

DISCUSSION

The present study is the first to report the clinical and histological features of this disease in the Indian population. The disease is characterized by a chronic, progressive, and bilateral inflammation of the choroid and retina.

The disease is characterized by a chronic, progressive, and bilateral inflammation of the choroid and retina. The clinical features include pain, photophobia, and decreased vision. The histological findings show a mixed infiltrate of mononuclear cells, including lymphocytes, plasma cells, and macrophages.
